MAINTENANCE TIPS

As temperatures begin to drop, here are a few helpful reminders to keep your home comfortable and safe this winter season:

- **Drip Faucets During Freezes:** When temperatures fall below freezing, let your faucets drip slightly and open cabinet doors under sinks to help prevent frozen pipes.
- **Keep Your Thermostat Set:** Maintain your thermostat between 70°F and 72°F for optimal comfort and to help prevent frozen lines.
- **Check & Change Filters:** Air filters should be changed every 30 days to keep your heating system running efficiently. Fresh filters can also help improve indoor air quality.
- **Avoid Space Heater Overload:** If you use a space heater, plug it directly into the wall (not a power strip) and keep it away from curtains, bedding, and furniture. Always turn it off before leaving the room or going to bed.
